

June 25 59

Dear Josh:

We have only small samples of the Kel-F, since we use it only a drop at a time, and I hope that the enclosed will be of some use to you in deciding whether it will do. The address of the supplier is enclosed. I was wrong in thinking that it was a silicone; Gordon Ellis, my student who is working with it, tells me that it is a fluorocarbon. So, you may be unintentionally be doing experiments on extraterrestrial organic chemistry.

Best regards.

Yours,

Daniel Mazia
